How to Add an Icon

1. Open the ui file in Qt Designer

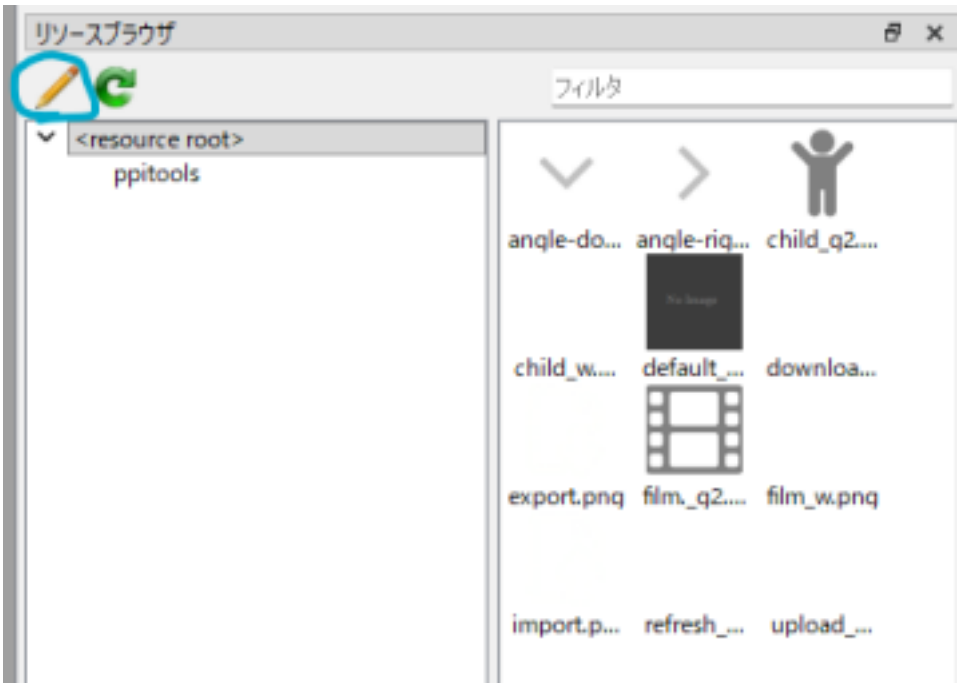

`src\ppiTracker\ui\mainWindow.ui`

2. Add the icon in the Resource Browser

2.1 With mainWindow selected, choose `<resource root>`

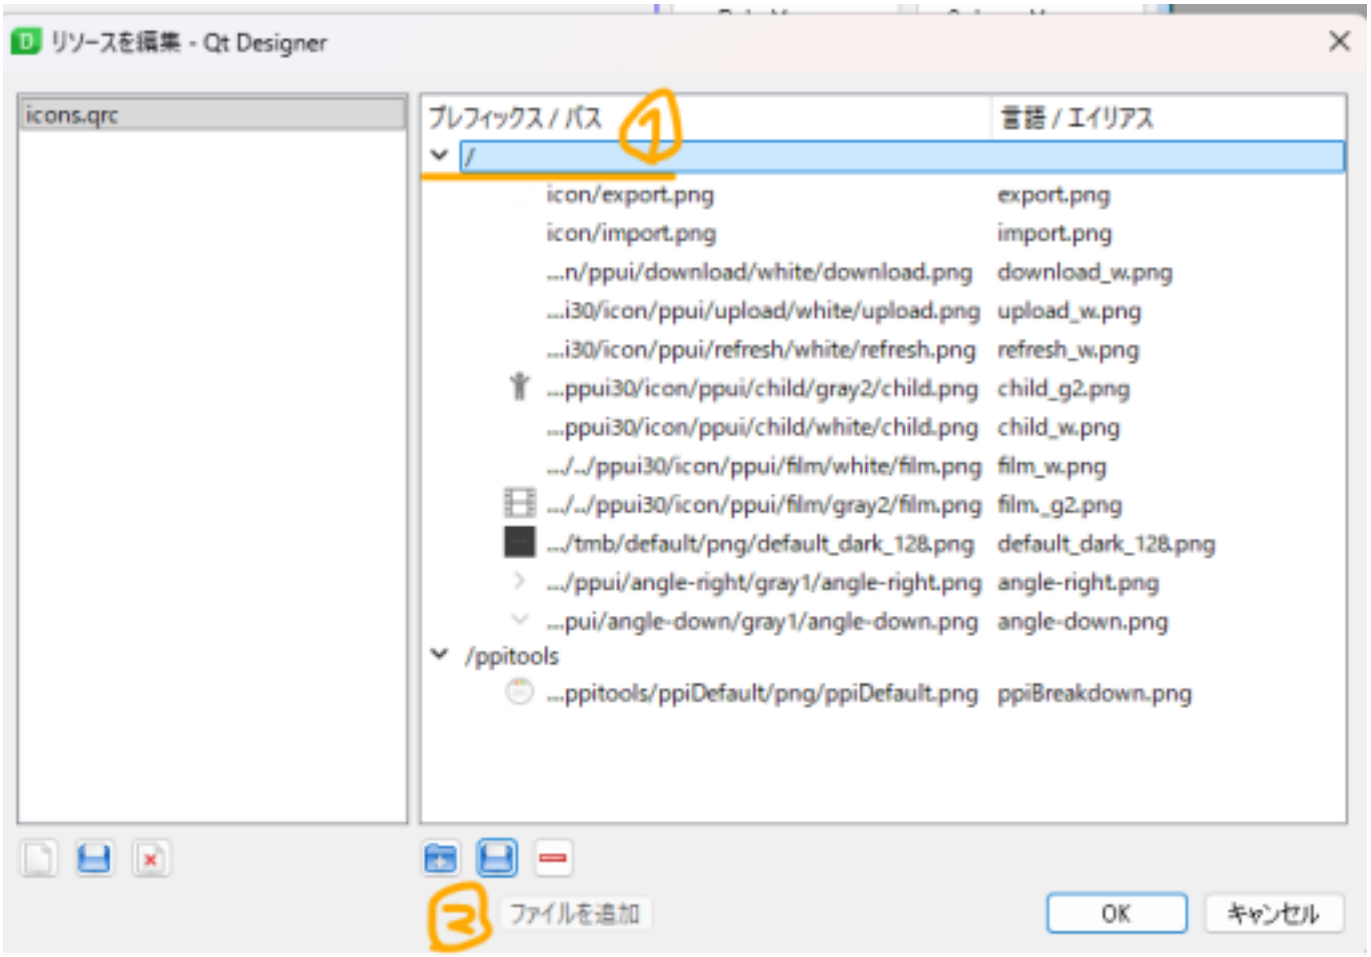

2.2 Click the pencil icon

2.3 Add a file

①: Select /

②: Click the add file icon

2.4 Select the file to add

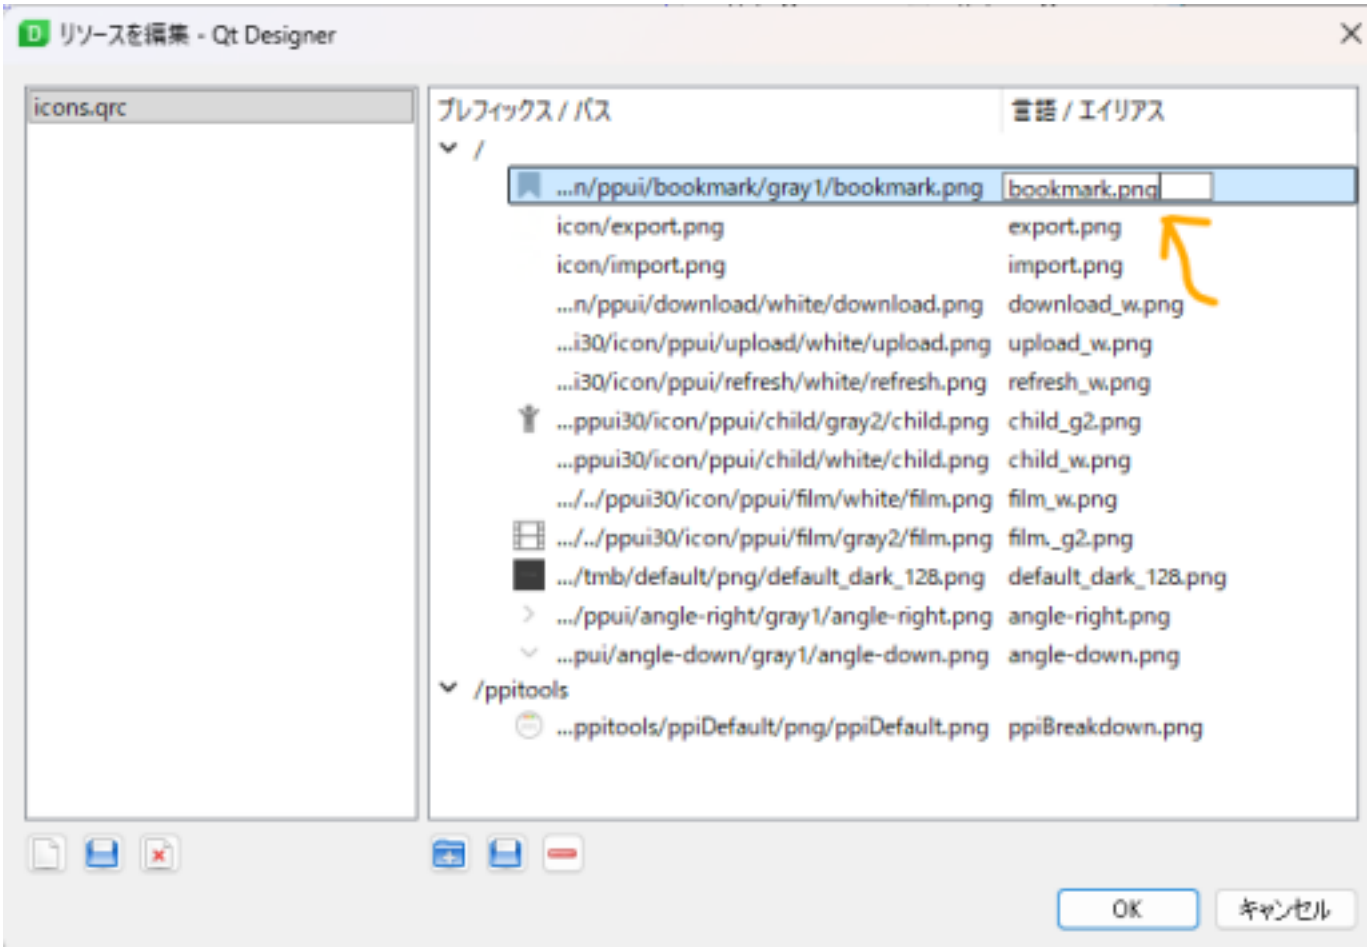

Select the file to add from `ppui30/icon/ppui` in the ppui30 repository.

In the dialog that appears when adding, click `Keep`.

2.5 Enter the file name (alias) for the added file

Double-click the alias column and enter the file name.

3. Convert the qrc file

Run the following command to convert the qrc file into a py file:

```
pyside6-rcc -o src/ppiTracker/ui/icons_rc.py src/ppiTracker/ui/icons.qrc
```

4. Usage

You can use the icon by passing the entered file name (alias name) to QIcon:

```
QIcon(':/child_w.png')
```
